CLEAN PROTECT

PTFE DRY LUBRICANT

PTFE DRY LUBRICANT WITH LONG-LASTING LUBRICATING EFFECT

High-quality lubricant with Teflon additive for lubrication of metal and plastic parts on machines (preventive maintenance), to prevent friction between moving surfaces.

PROPERTIES

- Lubricates and reduces friction and wear.
- Rust-proof.
- Water repellent.
- Does not contain silicones.
- High temperature resistance.
- For internal and external use
- Can be used at any angle (360°)

FIELD OF APPLICATION

- It is suitable for use on parts that are longer and more exposed to friction.
- When the lubricant disappears, PTFE takes over as lubricant for a while.
- Can be used at temperatures from -20°C to +120°C.
- The spray has a high penetration capacity and is therefore used for machinery, roller bearings, axles, gears, conveyor belts, rubber, sealing profiles...

USAGE INSTRUCTIONS

- Shake the dose well before use.
- When you hear the sound of metal balls inside the dose, continue shaking for another minute.
- Apply the lubricant on a clean and dry surface.
- Hold the dose 15 to 20 cm from the surface to which the lubricant is applied.
- For best lubrication results, keep the parts moving during lubrication.

PACKAGING

Aerosol dose 400 ml

STORAGE

36 months in a dry place at a temperature between +5 °C and +25 °C. Store the doses in an upright position.

HEALTH, SAFETY, HANDLING AND DISPOSAL INFORMATION

Follow normal working hygiene. Use only in well-ventilated areas. Additional safety information, safe handling instructions, information on personal protective equipment, and disposal information can be found in the safety data sheet. Safety data sheet available on request. You can also obtain a copy from your TKK sales representative.

WARNING

The information given is based on our tests and practical experience. However, due to specific conditions and working methods we recommend preliminary tests for each case of use.
