CLEAN PROTECT

CONTACT CLEANER SPRAY

SPRAY FOR ELECTRICAL CONTACTS

It is excellent for general cleaning, degreasing and care of all types of dirty or corroded electrical contacts and components.

PROPERTIES

- Removes oil, wax, and other dirt.
- Does not cause rust.
- Dissolves oxide and sulfide layers.
- Wicks away moisture, is waterproof.
- Improves electrical current transmission at joints.
- Can be used at any angle [360°].
- Leaves no traces.
- For outdoor and indoor use.

FIELD OF APPLICATION

- It is suitable for electrical contacts such as switches, relays, electrical circuits, batteries, measuring tools, etc.
- It cleans and deoxidises surfaces and improves the transmission of electric current on electrical contacts.
- Prevents the ingress of moisture that could disrupt the flow of current.
- It is also suitable for dehumidifying tools for working with electrical appliances.

USAGE INSTRUCTIONS

- Shake the dose well before use, switch off electrical equipment and unplug it from the mains before application.
- Spray onto the component and wait a few minutes.
- Spray again to remove dirt. Dry with clean and dry cloth.
- The devices can only be connected to the mains once the applied liquid has completely dried.

PACKAGING

Aerosol dose 400 ml

STORAGE

36 months in a dry place at a temperature between +5 °C and +25 °C. Store the doses in an upright position.

HEALTH, SAFETY, HANDLING AND DISPOSAL INFORMATION

Follow normal working hygiene. Use only in well-ventilated areas. Additional safety information, safe handling instructions, information on personal protective equipment, and disposal information can be found in the safety data sheet. Safety data sheet available on request. You can also obtain a copy from your TTK sales representative.

WARNING

The information given is based on our tests and practical experience. However, due to specific conditions and working methods we recommend preliminary tests for each case of use.
